MURKES MILL IN ASHES.

A Loss of \$45,000, Not Covered by Insurance.

The twenty-stamp mill owned by the Minerva Consolidated Mining company and situated on the Mimbreos, about three and one-half miles below George town, in Grant county, was totally destroyed by fire about 2 o'clock Sunday morning. The fire was undoubtedly of incendiary origin, as the mill has been idle for several years past. The flames had gained great headway when discovered, and in a comparatively short time the entire building was a mass of smoldering ruins. The mill was erected in 1881, and will cost the entire \$45,000 required to replace it. Together with the mines owned by the company, yielded handsome profits. When the drop in silver came, however, and the mining industry in and about Georgetown came to an end, operations were suspended and were never resumed.

The original cost of the mill was something like \$45,000, and so far as known, was lost.
